◇ Outline and characteristics of the course for Teacher Training Students

① Characteristics of the program

Gunma University provides the study of elementary and junior high school education, school education system, and multicultural education. The program students can participate in laboratory's research activities depending on their major and career, and deepen their professional ability with Japanese students.

② Number of students to be accepted: 12 students

③ Period of scholarship: October 2025–March 2027

④ Requirement for program completion

Although it varies depending on the supervisor, students will attend approximately 60 hours of classes, seminars, etc.

⑤ Outline of the course

▪ Japanese language education

Starting in October 2025, an intensive Japanese course is offered to students with the N2 examination level of Japanese language proficiency in order to enhance their Japanese language proficiency to a level that enables them to conduct activities smoothly in specialized fields. The course runs for 16 weeks from October 2025 to February 2026, and consists of approximately 3 lectures per day for 5 days a week. Students below the N2 Examination level can take an online Japanese supplementary course for approximately 3 classes a week.

However, since this course aims to acquire the Japanese language level necessary for daily life, students who take the Japanese supplementary course must be able to receive research guidance in English.

Students who are already at the N2 level or above when they come to Japan, and those who have completed the above intensive course, can also take Japanese language courses that are open to undergraduate students and others if they wish to further enhance their Japanese language skills.

▪ Specialized training

Supervisor takes responsibility to advise the program students depending on their majors and needs. The students are required to take the professional classes and seminar in the lab. Registration of other classes aside from their research field would be acceptable if they want. Tutorial system is provided by an advisor considering each student's research subject.

No lectures are taught in English but the language might be used in advice on lectures, practice, individual guidance and daily life in supplementary means.

▪ Practical Training, Participatory subjects such as field trips and regional exchange, and others

The student's position is research student. No credits are certified. Outside activities such as visiting and lecturing at affiliated schools (kindergarten, elementary school, junior high school, school for children with special needs), excursion and so on are held.
